## Drinking Water Conditioners for Poultry

Aqua Softzone Water Conditioner, installed in-line on the main line or a secondary water delivery line from your well or municipal water system, can deliver conditioned water to any part of your entire poultry facility.

- Standard sizes range from 3/4" to 4" with Stainless Steel Construction.
- Minimum flow rates should be no less and 15% of the maximum flow rate for each size unit.
- Addition of chemicals may affect the use of the Aqua Soft Conditioner
- Chicks watered with Converter water grew larger, with an increase in the meat to fat ratio, and reduced mortality rates.
- Increase in Egg Production.
- It supports the growth and development of the bone structure in chickens and improves blood morphology.
- Premature death rates will be decreased by 2 to 3 times.
- No bacteria lives in the water so that the birds will be safe.
- Scale build up is reduced allowing for better water flow allowing nozzles and valves.
- As calcium is given in the feed for the bird our converter balances the calcium in the water.
- Reduces algae and bacteria buildup.
- Improves nutrient intake.
- Keeps (p.H) Stability in water.
- Prevents scale formation on cooling blades for climate control rearing of birds.
- Each unit comes with our 5 Year Limited Manufacturer's Warranty.
