- Eco-Friendly
- Uses No Chemicals
- Maintenance Free
- 5 Year Ltd. Warranty

FARMS and AGRICULTURAL APPLICATIONS

Agricultural Catalytic Water Conditioner installed in-line on your water delivery system from a Well or Municipal Water. With all Agricultural Systems Pre Filtration will be required prior to the installed position of the Aqua Softzone.

- Converter water makes more productive by increasing its bioavailability to plant cells
- Reduces leaf burn
- It delivers more oxygen and nutrients to the plant while reducing scaling and harmful salts
- Plants and seeds germinate sooner and more completely
- More plant for less water- a powerful boost for more profitable farming
- Increases water absorption and retention in soil
- Increases seed germination and improves crop uniformity
- Water from the outlet of the converter reduces the alkalinity and thereby the salinity of water gets removed and water absorbs into soil faster
- The crop production and the yield get increased by more than 60% of the normal crop yield
- Increases in nutrient solubility creates healthier plants and greater yields
- Improves soil conditions , improves plant vigor and quality
- The chlorophyll of the leaves i.e., greenish colour improves well and yellowish fading shall never appear on the leaves
- Ball valves and taps operate smoothly
- Improve pump efficiency by providing “wetter” water through piping system.
- Reduces heat stress on plants.
- With better nutrient intake the need for fertilizers are reduced.
